

049-147 Woodward, OK, tornado
(also photos from Glazier, TX and Higgins, TX)
9 April 1947

Damage investigation team: individuals from the then National Weather Bureau offices in
Amarillo, Kansas City and Fort Worth

There is no explanation of how we acquired these photos but as we have actual photographs I am
cataloging this storm in the archive (on 10/3/02).

Notes:

- The photos are mounted on cardstock paper and photo descriptions are typed under each photo
- Notes from The Tornado Project and NWS-Norman websites (Tornado Project categorizes this storm as the #6 U.S. Killer Tornado)

Negatives: none

Prints: on cardboard, currently in file cabinet

Slides: none

Conservation Notes:

At some point the photos need to be properly removed from the backing. However, they currently appear in pretty good condition and the glue used does not seem to have caused any discoloration at this point. (Oct 2002).
